INTRA & Venezuela

LOCATION Venezuela **FOCUS** Censorship **YEAR** 2018

DNS manipulation is one of the most common cyber tools used to block access to websites and communication tools. As we were developing Intra, an app that makes it easy to bypass DNS manipulation, we worked closely with Venezuelans to regularly test the tool and give us technical and design feedback. Intra is now used by people in dozens of countries around the world who need a way to access news sites, communication tools and platforms.
